

0.957

0.942

### High memorability

- Human presence is visually salient
- Person and focal product have similar visual weight (low relative imbalance)
- Visually dominant focal product; simple background

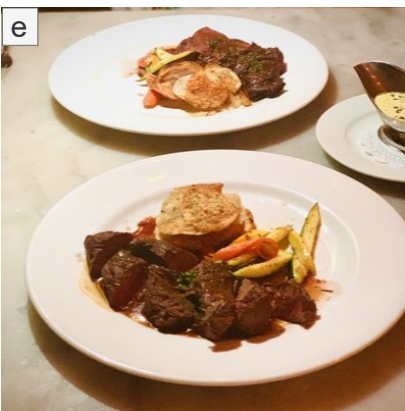

0.689

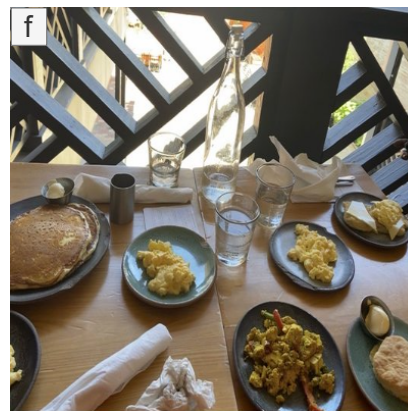

0.687

### Moderate memorability

- People present but is small or off to the side (not the focal point)
- Non-person objects occupy most of the frame (high relative imbalance)
- Scene is visually busy; focal point is diffuse

0.486

0.449

### Low memorability

- No person
- Non-person objects fully dominate the frame (extreme imbalance)
- Multiple similar items with no single focal product; overall structure is diffuse
